- JDN Service
- JDN Hydraulic Crane Systems

Tip of the Month

The Operating Time Calculator under www.jdn.de is now available in French and Spanish.

JDN Image Brochures and Distributor Posters

Ask for the current JDN Image Brochures and Distributor Posters.

JDN Service expanded

With the JDN Inspection Log we offer an ideal instrument for the documentation of all measurements that have been carried out at your crane and hoist.

In addition we offer the calculation and dimensioning of the travelling beams, the dimensioning of the screw connections between travelling beam and hall support as well as the calculation of the force effect on the hall supports for the check of the hall statics provided by the customer.

For functional tests under load we provide test loads just in time. This saves costs and resources.

JDN Hydraulic Crane Systems

As an alternative to compressed air we offer hydraulic driven crane systems adapted to your individual demands.

Here some examples:

- Radio Control

Transmitter with comprehensive applications

- Control Box

Control box with receiver as electro-hydraulic interface

Crane types in detail:

- Single or double girder overhead travelling cranes
- Underslung cranes with special low headroom trolley designs
- Slewing jib cranes
- Cranes with synchronised hoist arrangements
- Cranes with parallel hoist arrangements

- Tubing

Complex installation with stainless steel tubes

- Rack and Pinion Drive

For safe and form-fit power transmission e.g. for offshore applications or on vessels
