- JDN Air Hoists for the Food Industry

## Tip of the Month

Current press releases are available under [www.jdn.de](http://www.jdn.de).

## Website Award NRW 2010

With the Website Award NRW 2010, a promotion of the Federal Ministry of Economics, the best company websites from North Rhine-Westphalia, Germany, are chosen.

For the first time JDN has entered this contest and came in fifth of 300 competitors.

“Main assessment criterion is the quality of the appropriateness to the target group. Thereby the preparation of available information around the products is as important as the technical realisation of functionalities. Irrespectively, if the website can be used for communication, commercial activities or contract conclusions.”

## JDN Air Hoists for the Food Industry

The food industry makes highest demands on the hygiene and the quality of the applied hoists. Thereby it's not sufficient that these hoists are working efficiently and economically.

Furthermore air hoists have to be designed in such a way that no oil will be emitted with the exhaust air and that they can be fast and easily cleaned. A further requirement is a low maintenance. Corrosion resistance is a must.

J.D. Neuhaus offers the food industry air driven hoists and trolleys which meet all these requirements. JDN Air Hoists have a patented motor-brake system that requires no additional lubrication. Thus no lubricant particles were emitted to the environment with the exhaust air. The surface of the hoists and trolleys can be plated with nickel.

That makes the products corrosion-resistant, durable and facilitates the cleaning, because the smooth surfaces prevent the ingress of dirt.

Typical JDN Products for the food industry are the air hoists of the PROFIS series with carrying capacities from 250 kg up to 2000 kg (available up to 100 t as standard). The corresponding trolleys make the PROFIS mobile. Whether in standard version or in low headroom trolleys, if only low spaces are available. For extremely low spaces we offer the JDN Ultra-Low Monorail Hoists.

JDN Air Hoist PROFI 05 TI in Low Headroom Trolley, nickel-plated.

Furthermore the hoists can be equipped with stainless steel chains, load sleeves and hooks. The few number of components provides for low maintenance, economical operation and high reliability.
